Here's your Step-By-Step blueprint

Step #1

Find out how to create your own Affiliate hop link properly.

[Watch this video here](#) and learn how to get and create your Affiliate Link.

[Watch this video here](#) and learn how to create a re-direct Affiliate Link.

Step #2

Write a 300-500 word article about why you like or recommend the eBooks or Home Study Courses you are promoting. Here is a pretty easy way to begin if you are not sure what to say:

- What is it
- How did you learn about it
- How will it make your life better
- where can you get it

Then publish this article on your web site, blog or web pages and **remember to insert your own Affiliate link throughout the whole of the articles** that you are publishing. Keep these rules in mind when you write and publish your article

The Keywords must be

- in the title
- 2-3 times per 100 words
- must be the LAST word of the article (try your best for your keywords to appear as the last words in your article, do not force)

This will enable the search engines to pick up your articles pretty fast! Learn how to use and find the RIGHT keywords!!! [This video tutorial will give you some pretty cool ideas!](#)

Step #3

We want you to have fun while running your Affiliate business, either part-time or full time. Some of my affiliates ask me if it is better to have their own Domain name. There is an advantage for you if you can get your Domain Name right now, because it will give you a professional image, and you can build a great relationship with your potential customers and clients.

Your Success Blueprint!

However, if you do not wish to [get your own Domain name](#) yet, you can still build web sites and web pages using a number of good, free resources out there. I highly recommend using the following FREE resources:

[Blogger.com](#)

[Wordpress.org](#)

You can still build web sites using software to help you do that. My personal favourite software can be found [here](#). I am not a programmer and not very technical, so this software has indeed helped me a lot in creating beautiful web sites (that the search engines love!) whenever I want to.

My personal favourite and recommendation is to use [Wordpress](#), which is simply a powerful tool to create any niche sites that you want, and it allows you to constantly update your site with fresh contents which the search engines love absolutely! **So start off by using Wordpress if you can.** And of course it's your choice.

Here is [a powerful course](#) which you can take up in order to fully master Wordpress. If you desire to know how to make a full time income just from blogs (and YES it CAN be done!), this [useful course](#) is highly recommended too!

By the way, if you can get your own [Domain and Domain names](#), this is actually a HUGE business in and of itself! *I myself wish I have known this earlier, but this is a secret which most gurus would NOT tell you right from the beginning.*

If you can choose and get the right domain right from the beginning, you can actually monetize on your Domain name in the future!

Just [read the amazing story here about the man who makes more than 2.4 million from Domain Names alone. I wish I have his course earlier](#), so make sure you check him out if you have the time. Another [great videos course](#) that I highly recommend can be found [here](#).

Step #4

Create additional pages and sites using the following free resources, which are actually Web 2.0 sites. **Just use the combination of the Videos, Articles, Reviews, Testimonials, Reports, Mini-ebooks that we have given you** and which you can brand for yourself. Publish and upload these to the pages you can create at:

[Squidoo.com](#)

[hubpages.com](#)

[youtube.com](#)

Your Success Blueprint!

weebly.com

Google loves these pages!!! Here are your proven strategies to using these pages:

- a) Put your articles (or the articles we provide you) on Web 2.0 sites
- b) Remember to input the **right Keywords in Page titles, titles, tags** etc.

Step #5

Go to contents sharing sites and tell the world!!! Submit EACH of the above sites/pages you have created in STEP#4 to social bookmark sites to get a tremendous amount of traffic to your web sites and pages! You can use [this free tool here](#) to submit to tons of social bookmarking sites, or you can automate your task by using this [cool software](#) here!

Digg.com

Mixx.com

shoutwire.com

propeller.com

Submit your articles and stories to each of the content sharing sites listed above to get a lot of free traffic to your Blogs and web pages! You can submit manually, but if you are like me and you know time is money, you can **automate the whole process using the software I've just recommend you.**

Step #6

Submit RSS Feeds!

Use tools like this [RSS submit software](#) which can help you save tons of time and automate the whole process for you. Usually after about 8 hours your blogs and sites can get up to top of Google!

Keep your own schedule, and **repeat STEPS #2 - #6 at least once a week**, be VERY focused and keep on promoting your blog and site and you will definitely see results for yourself.

Remember, the Key to your success is always this:

STAY FOCUSED!!!

Your Success Blueprint!

Do not be distracted by spending time reading ideas or web marketing techniques by other people and wasting your time. Always strive to stay focused and **get something done**. If you decide to promote your blog today using articles marketing, just make sure you stay focused and spend quality time just submitting articles to article directories and bringing traffic back to your blogs. If you can only create one blog, make sure you focus on making it into an authority blog which many people will enjoy reading and coming back for more!
